

Wireless Ensemble

MartinLogan's Wireless Ensemble delivers superior audio performance using the best streaming technologies available. Included here are just a few of the outstanding accolades they have received.

Cadence™

hometheater July 2017

review.com <http://bit.ly/2vtJC2k>

"...this is a high-end product that is well engineered and performs exceedingly well. It's a no-brainer for someone who wants to take their home theater to the next level without adding the hassle of a dedicated surround sound system. The bottom line is that this is an epic, game-changing home theater solution that's simple to set up, will play back just about anything you want, and will do so brilliantly." - **Sean Killebrew**

May 2017

<http://bit.ly/2v0ezsj>

"For the vast majority of our readers, I suspect their home theater also doubles as a family room or living room. Just because you have to make some compromises in buying separate components doesn't mean you have to compromise in sound quality." - **Jim Milton**

Motion Vision X

AVSFORUM February 2016

<http://bit.ly/2uhTlyW>

"High fidelity is what sets the Vision X apart from its competition, and I have never heard another powered soundbar sound so much like a high-quality speaker system. The Vision X is a great choice for a modern living room where a full-sized stereo is not an option but high-quality sound is desired." - **Mark Heninger**

Unison™

simplifi June 2018

<http://bit.ly/2tbxv7M>

"ML's Unison preamp had the clarity I've come to expect from the best systems, and ARC seemed to me better than ever. Subtle details of instruments' sounds were better integrated, my room's midbass boom was gone, and the precision of the placement of instruments and voices on the soundstage was no longer limited by the room."

- **Wes Marshall**

TechHive June 2017

<http://bit.ly/2sk1njN>

"I simply loved the MartinLogan Unison. It lets you convert virtually any analog or digital audio component into a multi-room audio node using your choice of DTS Play-Fi or Apple's AirPlay. The inclusion of ARC is icing on the cake that enables the gear it's connected to to deliver the best performance possible from the room that it's in. The Unison is a no-brainer recommendation." - **Theo Nicolakis**

Bravado™

home**theater**
review.com

July 2017

<http://bit.ly/2v10dSx>

"Maybe this is just me, but typically the more time I spend listening to a given set of speakers, the more fault I'm able to find. I had the opposite experience with the Bravados. With each listening session, I noted a different strength." - Sean Killebrew

Forte™

SECRET'S Home Theater High Fidelity

August 2017

<http://bit.ly/2vtNvnB>

"The MartinLogan Forte amp has packaged a powerful wireless streaming amp with advanced ARC room correction in a small affordable unit that is almost too good to be true." - Francisco Licon
