

Sonic Precision. Sophisticated Styling.

Inspired by MartinLogan's high-end electrostatic loudspeakers, the Motion Series was created to provide stunning sound for your ultimate-performance home theater or stereo. MartinLogan's dedicated in-house engineers carefully crafted the Motion Series to create an extremely affordable and compact product line that seamlessly blends our exquisite Folded Motion™ transducers with powerful, compact bass technology. The result is a smooth, refined sound with stunning dynamic range and jaw-dropping clarity.

Meet the Family

Motion Series speakers are available in floor standing tower and ultra-compact bookshelf models. Speakers can be mixed-and-matched (along with any of MartinLogan's high-performance subwoofers) to create a stunning solution for any application—from a spectacular high-performance 2-channel music system to an exhilarating multi-channel home theater system. Voice-matched with MartinLogan electrostatic speakers, Motion Series Speakers also offer a perfect solution for compact rear-channel applications in traditional electrostatic based home theater systems.
