

Voyage

IN-WALL STEREO/HOME THEATER FRONT/CENTER/SURROUND

ULTIMATE-PERFORMANCE IN-WALL

At best, typical in-wall speakers are boring (and often much worse than that). So we designed the Voyage to be an "anti-in-wall," the antithesis of ordinary. Advanced Thin Film drivers, low-distortion aluminum-cone woofers, and a sophisticated Vojtko crossover ensure that every nuance of the audio signal is preserved. The speaker's graceful, elegant lines create a sense of architectural integration, while paintable end caps, and a selection of grille colors provide incredible adaptability.
